PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of professional experience building cross-platform mobile applications using Flutter and Dart. Delivered production apps across gaming, dating/social, audiobook, and astrology domains — including two apps built independently end-to-end. Skilled in MVVM, Clean Architecture, Provider, BLoC, REST APIs, Firebase, Dio, Socket.io, Agora, and Flutter Flame, with a focus on reusable components, responsive UI, and performance optimization.

TECHNICAL SKILLS

Languages: Dart

Framework: Flutter

Architecture: MVVM, Clean Architecture, Repository Pattern

State Management: Provider, BLoC, GetX

Backend & APIs: REST APIs, Firebase, Dio, Socket.io

Database & Storage: Hive, SharedPreferences

Tools: Git, GitHub, Android Studio, VS Code, Figma, AI-assisted development (Claude, ChatGPT)

Other: Agora, Flutter Flame, Responsive UI, RTL Localization, Audio/Video Playback, In-App Purchases

PROFESSIONAL EXPERIENCE

Flutter Developer — Trilia Solutions, Kerala

Oct 2025 – Mar 2026

- Built EverQpid, a dating app, independently from architecture through Play Store release, as the sole Flutter developer on the project.
- Developed the customer-facing app for Astro, an astrology platform, alongside a companion admin web app.
- Contributed to ShutterX, supporting ongoing feature development and bug fixes.
- Developed real-time communication features using Socket.io and Agora.
- Integrated Firebase Authentication, REST APIs, and Dio while following MVVM architecture.
- Designed reusable widgets and modular UI components to improve maintainability.
- Collaborated with backend developers to integrate APIs and resolve production issues.
- Optimized application performance and responsiveness through code refactoring.

Flutter Developer — Dreamloop.ai, Kerala

Nov 2023 – Sep 2025

- Developed core modules for Max2D, a no-code visual game engine, using Flutter and Flutter Flame.
- Engineered event systems, asset management, and interactive controls, enabling 1,000+ customizable game templates.
- Improved rendering performance by up to 50% on low-end devices.
- Designed the UI and integrated advanced audio playback features for NovelFM, a novel-reading and audiobook app.
- Implemented RTL localization and responsive layouts across multiple screen sizes.
- Connected applications to REST APIs using Provider-based state management.
- Implemented project import/export functionality to improve user workflow.

KEY PROJECTS & PUBLISHED APPS

EverQpid — Dating App | Trilia Solutions · Built independently, end-to-end

Flutter, Firebase, REST API, Socket.io

Play Store: <https://play.google.com/store/apps/details?id=com.everqpid.customerapp>

Max2D — No-Code Game Engine | Dreamloop.ai

Flutter, Flutter Flame

Play Store (search): <https://play.google.com/store/search?q=max2d&c=apps>

NovelFM — Novel Reading & Audiobook App | Dreamloop.ai

Flutter, Provider, REST API

Play Store: <https://play.google.com/store/apps/details?id=com.novelfm.novel>

Tickshow — Quiz App | Freelance Project · Delivered independently

Flutter, Provider, Razorpay, REST API

- Built a quiz application with authentication, wallet, payment gateway, and leaderboard features.
- Integrated custom REST APIs and timer-based scoring.

KEY ACHIEVEMENTS

- Improved rendering performance by up to 50%.
- Developed support for 1,000+ customizable game templates (Max2D).
- Delivered two apps (EverQpid, Tickshow) independently, end-to-end, from architecture to release.
- Built reusable game engine modules for events, actions, controls, and assets.

EDUCATION & CERTIFICATION

Flutter App Development Program — Brototype (2023)

Self-learning through Flutter documentation and open-source projects.
